

Socio-Demographics

MB-International
Worldwide Geodata

The key indicator for sound location and sales territory planning

Data - Globally consistent and comparable

Socio-Demographics

For the purpose of target group specific consumer analyses or general profiling of the areas a number of variables can be provided on the basis of official statistics.

Our Sociodemographics contain the following variables as a standard:

- Population
- Households
- Gender
- Age bands (15-year age bands)
- Unemployed

Furthermore we offer additional variables depending on availability such as Households by Income Quintiles, Education, Households by Type, Marital Status and Consumer Styles.

Advantages of the MB-International Sociodemographics

- Globally consistent and comparable
- Our data is subjected to a strict quality control and constantly updated by means of comprehensive research by our in-house statistical & geographical department
- Sociodemographics data allows companies to zero in on their regional markets with increased precision and accuracy
- Using our postcode or administrative boundary maps for the geographic visualization of Sociodemographic Data allows for an even more effective and efficient decision-making.

By using MBI Sociodemographic Data you are able to:

- Quantify regional sales opportunities/market potentials
- Evaluate areas for strengths and weaknesses
- Identify unused market potential
- Set realistic local economic forecasts
- Focus locally on Marketing activities
- Formulate quantified and realistic objectives
- Restructure and optimize market and sales areas

To furnish users with a broad variety of data for different sets of tasks, various indicators for regional demand are compiled:

Socio-demographics bundle:

Population, households, gender and 15-year age-bands, unemployed

Population figures are shown as projected averages for current year on the basis of official statistics. They are represented in absolute numbers and per mille shares

Global Data Levels

Postcode (zip) Level

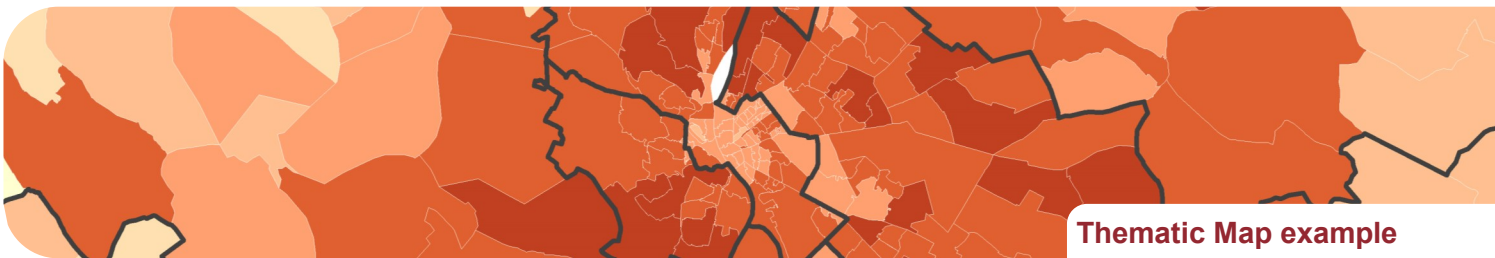

Worldwide postal areas are geographic boundaries that define the geographic area for each postcode

Administrative Area Level

Municipality boundaries plus the higher levels like provinces and state boundaries

Small Area Levels

Could be subdivisions of the postcode or administrative boundaries like census areas

Methodological Notes

To safeguard users from methodological challenges by typical work with regional data from different sources, the regional raw data (on bases of research at the national statistical offices, in some countries also regional statistical offices) were adjusted to national figures from internationally comparable data sources (UN, ILO, EUROSTAT and other international organisations).
