MBI CONIAS RISK INTELLIGENCE

MBI CONIAS Self-Explaining Risk Data

Empower Your Risk Management with Comprehensive Political Risk Insights

At MBI CONIAS, we understand the intricate landscape of political risk and the crucial need for actionable insights. That's why we offer the MBI CONIAS Self-Explaining Risk Data, a suite of products designed to provide clarity, context, and foresight in navigating political challenges worldwide.

Self-Explaining Political Risk Data

Our flagship offering translates raw data into meaningful narratives, enabling both seasoned as well as less experiences analysts to swiftly grasp critical insights. We provide not just data, but an interpretation that assesses the consequences of political risks, allowing you to evaluate the extent of politically motivated violence and make informed decisions. For adequate risk management, the data is given a temporal context.
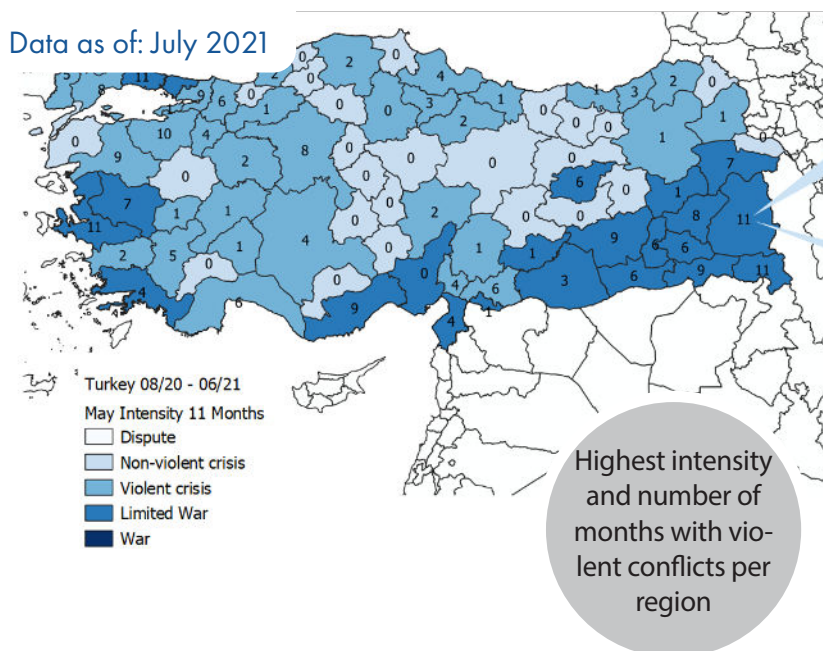

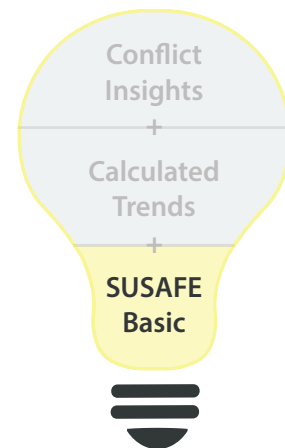

Key Differentiators

- Globally consistent and comparable data
- Strict quality control for reliable insights
- Individual consulting and support for tailored solutions
- Continuous updates to stay ahead of evolving risks
- 100% GDPR compliant for data security and privacy assurance
- Monthly or quarterly updates available

CONIAS SUSAFE Basic – Your Foundation for Risk Analysis

With CONIAS SUSAFE, gain a comprehensive understanding of the current political landscape and its temporal context. This foundational product offers insights into conflict intensity, trend development, and conflict details per region, essential for effective risk management.

- Analyze current situations and trends
- Place conflicts in temporal context
- Understand conflict intensity and frequency
- Map conflicts for easy visualization

Data as of: July 2021

Turkey 08/20 - 06/21
May Intensity 11 Months
- Dispute
- Non-violent crisis
- Violent crisis
- Limited War
- War

Highest intensity and number of months with violent conflicts per region

"Attention! In the past 12 months, the intensity of "limited war" has already been observed in this region - this significantly increases the risk of escalation."

Both numerical indicators can also be translated "as text" by concise explanations for the user.

"The region was affected by political violence in 11 out of 11 months before. We categorize this situation as 'high frequently'."

CONIAS SUSAFE Basic

DELIVERED ATTRIBUTES FOR ALL REGIONS: Name and ISO code for region and country, start of evaluated period, highest measured intensity

ATTRIBUTES SHOW DETAILS OF THE CURRENT CONFLICT SITUATION: Impact of highest measured intensity, number and impact of violent conflicts this month, number of violent conflicts in the past 12 months
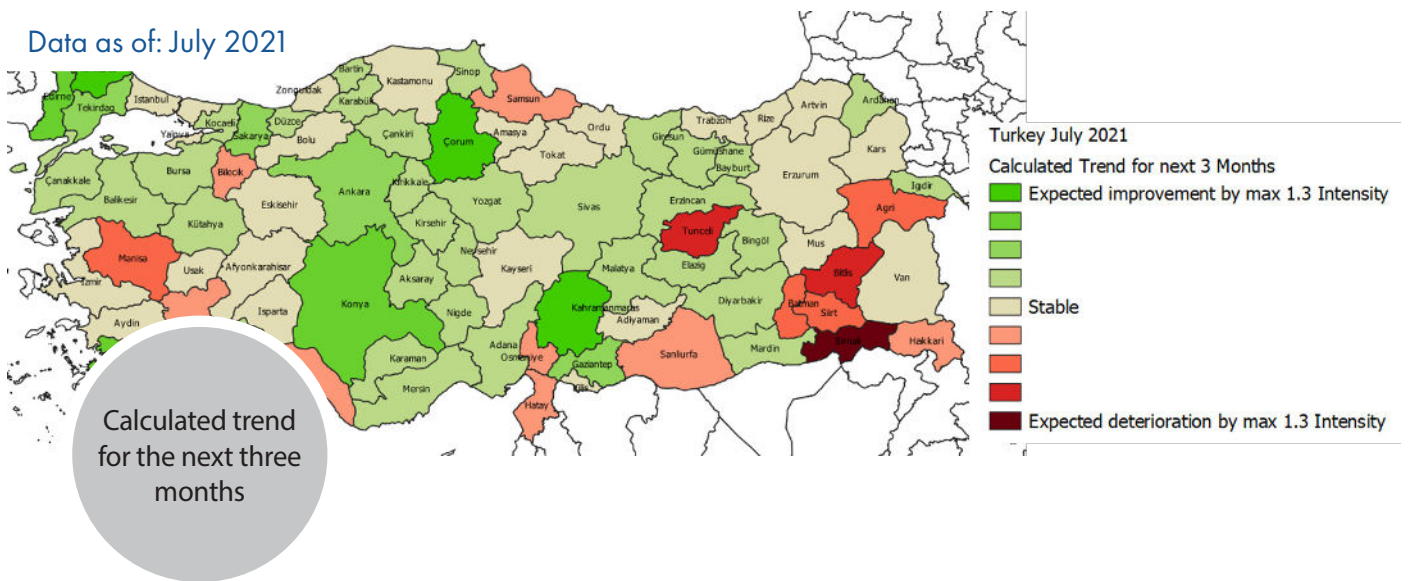

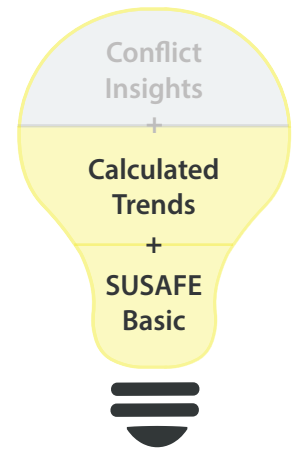

ATTRIBUTES COMPARE CURRENT SITUATION WITH A 12 MONTHS RETROSPECT: Highest measured intensity and impact in past 12 months, number and impact of months with violent conflicts, number of indirect conflicts

"IMPORTED" CONFLICTS CAN ALSO INFLUENCE THE SECURITY SITUATION: Number of external conflicts, median value of highest monthly regional intensity
